

8385 PARALLEL LINKAGE BEDDER

TIME-TESTED ORTHMAN DURABILITY

To stay out in front, you need equipment that sets up easily, adjusts precisely to what you need on any given day, does exactly what it was designed to do reliably and efficiently, and stays on the job season after season.

The 8385 has set the industry standard with Orthman's often-copied- but never-duplicated- design. Year after year reliability is a trademark of the Orthman Parallel Linkage Bedder, and is unmatched by anyone in the industry. The heavy duty, wrap-around parallel linkage is the product of over THREE DECADES of high horsepower row crop tillage experience, and provides precision depth control in the roughest of terrain.

Superiority continues with the rotary moldboards mounted on high strength steel shanks that offer a smooth and consistent pull, and create perfectly shaped beds. Precision bed building and maintenance is an easy task for the Orthman Parallel Linkage Bedder, especially when built on the proven Orthman stackfold toolbar. Available in 30" to 40" spacings and in a multitude of configurations, from 6 to 18 rows, the system will adapt to a wide variety of applications.

Wrap-around parallel linkage

Easy depth adjustment

Double heavy-duty sealed bearings

Wrap-around parallel linkage

Your precision built bed starts with Orthman's time tested rugged & durable row unit foundation. The heavy duty parallel linkage row unit operates independently of the toolbar giving you consistent depth control for precision bed shaping in uneven field conditions.

Wrench-free depth adjustment

Spend less time setting depth and more time working with the quick adjusting hand crank.

Rotary moldboards

Precisely shape your bed height, width and slope with the adjustable, smooth pulling rotary moldboards - perfected through decades of customer feedback.

Heavy duty down-pressure springs

Field conditions aren't always optimal, and the 8385's adjustable down pressure springs allow you to operate in the hardest ground conditions.

Rugged depth-band coulter

Cut through the heaviest residue in your fields while simultaneously maintaining precise furrow depth and flotation

Heavy-duty sealed bearings

Reduce your maintenance workload with Orthman's heavy-duty sealed bearings that allow you to conquer the toughest bedding conditions year after year.

Adjustable scraper

Sticky soil conditions won't affect your precision bedding operation with the adjustable scraper that keeps the depth-band coulter clean for consistent bedding pass after pass.

THE LEADER IN STACK-FOLD TECHNOLOGY

Orthman has always been the leader in stack-fold technology, and continues to provide the best stacking toolbars available today. Orthman stack-fold technology is the backbone of the Parallel Linkage Bedder, and combined they give you the ability to tackle the toughest bedding conditions with confidence. Orthman precision line-bored wide wing hinges offer increased strength and smooth folding that you can rely on for the life of your machine. Decades of successful use in the field have proven that there is no substitute for an Orthman. Built to handle the roughest conditions, Orthman stacking toolbars go from road-ready to working in the field quicker than you can say, "Make mine Orthman!"

COMPATIBLE WITH THE GPS-READY TRACKER IV™ IMPLEMENT GUIDANCE SYSTEM

Orthman is well-known for durability, strength, and being in the forefront of progressive trends such as implement guidance. Designed, engineered and built to last for years of production, the Tracker IV™ provides accurate and dependable implement guidance for any rowcrop application. When used in combination with the Parallel Linkage Bedder you can guarantee that you have built the most precise beds possible, with the optimal foundation to produce maximum yields.

	# ROWS	ROW SPACING	WEIGHT	TRANSPORT WIDTH
Rigid Bar	6	38"-40"	4,060lb	22' 0"
